

Monday	102 (88)	103 (88)	104 (72)
11:15 - 11:55	Operating the VM and Baremetal platform (1/2)	Swift cluster level metrics and analytics	Design Summit/Forum 101
12:05 - 12:45	Picking etcd as a base service	Swift automated policy tiering	Working group chairs collaboration and WG overviews
12:45 - 14:00	Lunch		
14:00 - 14:40	Ironic Feedback (Bare Metal & Networking)	Hierarchical Quotas (1/2)	Evolving the Community-Generated Roadmap
14:50 - 15:30	Future of configuration management in deployment tools	Hierarchical Quotas (2/2)	Evolving the User Survey
15:40 - 16:20	Deprecation of Postgresql	Making keystone consumable outside of OpenStack	neutron multi-site
16:20 - 16:40	Break		
16:40 - 17:20	Should we kill Stackalytics ?	Next steps for RBAC and policy	CellsV2 Operator/Developer /Community Coordination
17:30 - 18:10	Interop WG New Program Planning Session	How do you use Glance?	Using Searchlight to list instances across cells in nova-api

Tuesday	102 (88)	103 (88)	104 (72)
11:15 - 11:55	Distributed SNAT with DVR	Feedback from users for I18n & translation - important part?	Using Cinder for Nova ephemeral storage backend
12:05 - 12:45	Working with adjacent communities	Enhancing Log Message Headers for RT Debug and Traceability	Managing composite Rings in Swift
12:45 - 14:00	Lunch		
14:00 - 14:40	OpenStack User API Improvements	Skip-level upgrading - jumping ahead to catch up	Swift ops feedback session
14:50 - 15:30	OpenStack User API Improvements	OpenStack-Ansible operator feedback	Container sharding
15:40 - 16:20	API Microversions discussion hour	Future of configuration management in deployment tools	Small file optimization and DiskFile interface
16:20 - 16:40	Break		
16:40 - 17:20	Exposing deployer choices to end users without death	Operations and Administration Guides	Scaling Swift's rebalance
17:30 - 18:10	Features missing in OpenStack core for Public Cloud provider	Future of hypervisor performance tuning & benchmarking	Vitrage TBC

Wednesday	102 (88)	103 (88)	104 (72)
09:00 - 09:40	Collaboration between Telecom/NFV related groups	Special hardware	Oslo developer/operator feedback
09:50 - 10:30	ETSI NFV Specs' Requirements vs OpenStack Reality	Advanced instance scheduling - reservations and preemption	oslo.messaging: recommendations for non-RabbitMQ backends
10:30 - 11:00	Break		
11:00 - 11:40	Operating the VM and Baremetal platform (2/2)	Compliance/Security Certification for upstream OpenStack	The future of VPN as a service (VPNaaS)
11:50 - 12:30	Comparing Kubernetes and OpenStack resource management	Swift policy migration	Making Neutron easy for people who want basic networking
12:30 - 13:50	Lunch		
13:50 - 14:30	Kubernetes Ops on OpenStack	Neutron Pain Points	Keystone operator feedback
14:40 - 15:20	Methods and projects for deploying OpenStack with containers	get-me-a-network enhancements	Key Management Developer/Operator/Community Coordination
15:30 - 16:10	Kolla operators feedback	Neutron diagnostic tools	TBC
16:10 - 16:30	Break		
16:30 - 17:10	Hybrid cloud app interop: pattern used for hybrid app stacks	Moving resource claims from nova-compute to nova-scheduler	Horizon Operator & Plugin Feedback
17:20 - 18:00	Cloud-Native Design/Refactoring across OpenStack	Compute instance/volume affinity for HPC	Large Orchestration stacks

Thursday	102 (88)	103 (88)	104 (72)
09:00 - 09:40	Lifecycle Management with Containerized OpenStack	Users / Operators adoption of QA tools / plugins	Users/Operators: Contributing Multi-project Requirements
09:50 - 10:30	Writing applications for the VM and Baremetal platform	Swift cluster level metrics and analytics	Strategy for Unanswered Requirements
10:30 - 11:00	Break		
11:00 - 11:40	Queens Goals	High Availability in OpenStack	Zun developer/operator feedback
11:50 - 12:30	Queens Goals	Achieving Resiliency at Scales of 1000+	Shared Commercial Goals for OpenStack Public Cloud Providers
12:30 - 13:30	Lunch/Feedback session		
13:30 - 14:10			

14:20 - 15:00			
15:10 - 15:50			
15:50 - 16:10	Break		
16:10 - 16:50			
17:00 - 17:40
